Department of College and Career Readiness

Computer Repair, Operations and Maintenance (C-ROM) - I
Curriculum

5.0 Credits

Unit Four
Computer Repair, Operations and Maintenance (C-ROM)
Level I

Course Description

Computer Repair, Operations and Maintenance (C-ROM) I is a course designed to help students understand the basic, underlying concepts of the knowledge, skills and practices of the computer support industry by learning about its history, career opportunities, business ethics, health and safety, computer systems and troubleshooting skills.

Computer Repair, Operations and Maintenance (C-ROM) I is a five (5) credit course that spans four (4) units and meets daily for forty (40) minutes for the entire school year, or an equivalent with an alternate scheduling system. This course represents the first level of a three-year sequence of the program and targets 9th and 10th grade students interested in this field.

Educational Technology Standards

|---------------------------------------------------------------|

- **Technology Operations and Concepts**
  - Create a personal digital portfolio which reflects personal and academic interests, achievements, and career aspirations by using a variety of digital tools and resources.

- **Creativity and Innovation**
  - Apply previous content knowledge by creating and piloting a digital learning game or tutorial.

- **Communication and Collaboration**
  - Develop an innovative solution to a real world problem or issue in collaboration with peers and experts, and present ideas for feedback through social media or in an online community.

- **Digital Citizenship**
  - Demonstrate appropriate application of copyright, fair use and/or Creative Commons to an original work.

- **Research and Information Literacy**
  - Produce a position statement about a real world problem by developing a systematic plan of investigation with peers and experts synthesizing information from multiple sources.

- **Critical Thinking, Problem Solving, Decision Making**
  - Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.
# Career Ready Practices

Career Ready Practices describe the career-ready skills that all educators in all content areas should seek to develop in their students. They are practices that have been linked to increase college, career, and life success. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

## CRP1. Act as a responsible and contributing citizen and employee
Career-ready individuals understand the obligations and responsibilities of being a member of a community, and they demonstrate this understanding every day through their interactions with others. They are conscientious of the impacts of their decisions on others and the environment around them. They think about the near-term and long-term consequences of their actions and seek to act in ways that contribute to the betterment of their teams, families, community and workplace. They are reliable and consistent in going beyond the minimum expectation and in participating in activities that serve the greater good.

## CRP2. Apply appropriate academic and technical skills.
Career-ready individuals readily access and use the knowledge and skills acquired through experience and education to be more productive. They make connections between abstract concepts with real-world applications, and they make correct insights about when it is appropriate to apply the use of an academic skill in a workplace situation.

## CRP3. Attend to personal health and financial well-being.
Career-ready individuals understand the relationship between personal health, workplace performance and personal well-being; they act on that understanding to regularly practice healthy diet, exercise and mental health activities. Career-ready individuals also take regular action to contribute to their personal financial well-being, understanding that personal financial security provides the peace of mind required to contribute more fully to their own career success.

## CRP4. Communicate clearly and effectively and with reason.
Career-ready individuals communicate thoughts, ideas, and action plans with clarity, whether using written, verbal, and/or visual methods. They communicate in the workplace with clarity and purpose to make maximum use of their own and others’ time. They are excellent writers; they master conventions, word choice, and organization, and use effective tone and presentation skills to articulate ideas. They are skilled at interacting with others; they are active listeners and speak clearly and with purpose. Career-ready
## Career Ready Practices

individuals think about the audience for their communication and prepare accordingly to ensure the desired outcome.

**CRP5. Consider the environmental, social and economic impacts of decisions.**
Career-ready individuals understand the interrelated nature of their actions and regularly make decisions that positively impact and/or mitigate negative impact on other people, organization, and the environment. They are aware of and utilize new technologies, understandings, procedures, materials, and regulations affecting the nature of their work as it relates to the impact on the social condition, the environment and the profitability of the organization.

**CRP6. Demonstrate creativity and innovation.**
Career-ready individuals regularly think of ideas that solve problems in new and different ways, and they contribute those ideas in a useful and productive manner to improve their organization. They can consider unconventional ideas and suggestions as solutions to issues, tasks or problems, and they discern which ideas and suggestions will add greatest value. They seek new methods, practices, and ideas from a variety of sources and seek to apply those ideas to their own workplace. They take action on their ideas and understand how to bring innovation to an organization.

**CRP7. Employ valid and reliable research strategies.**
Career-ready individuals are discerning in accepting and using new information to make decisions, change practices or inform strategies. They use reliable research process to search for new information. They evaluate the validity of sources when considering the use and adoption of external information or practices in their workplace situation.

**CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.**
Career-ready individuals readily recognize problems in the workplace, understand the nature of the problem, and devise effective plans to solve the problem. They are aware of problems when they occur and take action quickly to address the problem; they thoughtfully investigate the root cause of the problem prior to introducing solutions. They carefully consider the options to solve the problem. Once a solution is agreed upon, they follow through to ensure the problem is solved, whether through their own actions or the actions of others.

**CRP9. Model integrity, ethical leadership and effective management.**
Career-ready individuals consistently act in ways that align personal and community-held ideals and principles while employing
## Career Ready Practices

Strategies to positively influence others in the workplace. They have a clear understanding of integrity and act on this understanding in every decision. They use a variety of means to positively impact the directions and actions of a team or organization, and they apply insights into human behavior to change others’ action, attitudes and/or beliefs. They recognize the near-term and long-term effects that management’s actions and attitudes can have on productivity, morals and organizational culture.

**CRP10. Plan education and career paths aligned to personal goals.**
Career-ready individuals take personal ownership of their own education and career goals, and they regularly act on a plan to attain these goals. They understand their own career interests, preferences, goals, and requirements. They have perspective regarding the pathways available to them and the time, effort, experience and other requirements to pursue each, including a path of entrepreneurship. They recognize the value of each step in the education and experiential process, and they recognize that nearly all career paths require ongoing education and experience. They seek counselors, mentors, and other experts to assist in the planning and execution of career and personal goals.

**CRP11. Use technology to enhance productivity.**
Career-ready individuals find and maximize the productive value of existing and new technology to accomplish workplace tasks and solve workplace problems. They are flexible and adaptive in acquiring new technology. They are proficient with ubiquitous technology applications. They understand the inherent risks-personal and organizational-of technology applications, and they take actions to prevent or mitigate these risks.

**CRP12. Work productively in teams while using cultural global competence.**
Career-ready individuals positively contribute to every team, whether formal or informal. They apply an awareness of cultural difference to avoid barriers to productive and positive interaction. They find ways to increase the engagement and contribution of all team members. They plan and facilitate effective team meetings.
## Differentiated Instruction

### Strategies to Accommodate Students Based on Individual Needs

<table>
<thead>

<td>• Reading partners</td>
<td>• Emphasize multi-sensory learning</td>
<td></td>
</tr>
</tbody>
</table>

### Assistive Technology

- Computer/whiteboard
- Camera phone
- Spell-checker
- Online Translation Software

### Tests/Quizzes/Grading

- Extended time
- Study guides
- Shortened tests
- Read directions aloud

### Behavior/Attention

- Consistent daily structured routine
- Simple and clear classroom rules
- Frequent feedback

### Organization

- Individual daily planner
- Display a written agenda
- Note-taking assistance
- Color code materials
### Enrichment

**Strategies Used to Accommodate Based on Students Individual Needs:**

- Adaption of Material and Requirements
- Evaluate Vocabulary
- Elevated Text Complexity
- Additional Projects
- Independent Student Options
- Projects completed individual or with Partners
- Self Selection of Research
- Tiered/Multilevel Activities
- Learning Centers
- Individual Response Board
- Independent Book Studies
- Open-ended activities
- Community/Subject expert mentorships
Assessments

Suggested Formative/Summative Classroom Assessments

- Timelines, Maps, Charts, Graphic Organizers
- Teacher-created Unit Assessments, Chapter Assessments, Quizzes
- Teacher-created DBQs, Essays, Short Answer
- Accountable Talk, Debate, Oral Report, Role Playing, Think Pair, and Share
- Projects, Portfolio, Presentations, Prezi, Gallery Walks
- Homework
- Concept Mapping
- Primary and Secondary Source analysis
- Photo, Video, Political Cartoon, Radio, Song Analysis
- Create an Original Song, Film, or Poem
- Glogster to make Electronic Posters
- Weebly to create a Website/Online Portfolio
Interdisciplinary Connections

New Jersey Student Learning Standards

8.1 Educational Technology

• 8.1.12.B.2: Apply previous content knowledge by creating and piloting a digital learning game or tutorial.
• 8.1.12.F.1: Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.

8.2 Technology Education, Engineering, Design, and Computational Thinking

• 8.2.12.C.5: Create scaled engineering drawings of products both manually and digitally with materials and measurements labeled.
• 8.2.12.D.3: Determine and use the appropriate resources (e.g., CNC (Computer Numerical Control) equipment, 3D printers, CAD software) in the design, development and creation of a technological product or system.
• 8.2.12.E.3: Use a programming language to solve problems or accomplish a task (e.g., robotic functions, website designs, applications, and games).
• 8.2.12.E.4: Use appropriate terms in conversation (e.g., troubleshooting, peripherals, diagnostic software, GUI, abstraction, variables, data types and conditional statements).

9.3 Career and Technical Education: Information Technology Career Cluster

• 9.3.IT-SUP.5: Demonstrate the use of networking concepts to develop a network.
• 9.3.IT-NET.1: Analyze customer or organizational network system needs and requirements.
• 9.3.IT-PRG.1: Analyze customer software needs and requirements.
• 9.3.IT-PRG.4: Demonstrate the effective use of software development tools to develop software applications.
• 9.3.IT-PRG.5: Apply an appropriate software development process to design a software application.
• 9.3.IT-PRG.10: Design, create and maintain a database.
• 9.3.IT-WD.1: Analyze customer requirements to design and develop a Web or digital communication product.
• 9.3.IT-WD.2: Apply the design and development process to produce user-focused Web and digital communications solutions.
- 9.3.IT-WD.6: Design, create and publish a digital communication product based on customer needs.
- 9.3.IT-WD.10: Comply with intellectual property laws, copyright laws and ethical practices when creating Web/digital communications.

**Common Career Technical Core (CCTC)**

**Career Cluster Education & Training**

IT-SUP 05 – Demonstrate the use of networking concepts to develop a network.

- IT-SUP 05.1 – Describe basic network classifications, topologies and network operating systems (NOS).
- IT-SUP 05.2 – Demonstrate the use of networking concepts in the support and maintenance of the computers on the network.

IT-NET 3 – Design a network system using technologies, tools and standards.

- IT-NET 3.1 – Demonstrate knowledge of the basics of network architecture.

IT-PRG 01 – Analyze customer software needs and requirements.

- IT-PRG 01.1 – Gather data to identify customer requirements.

IT-PRG 02 – Demonstrate the use of industry standard strategies and project planning to meet customer specifications.

- IT-PRG 02.1 – Utilize interpersonal skills necessary to work on a software development team.
- IT-PRG 02.2 – Define scope of work for the programming project.
- IT-PRG 02.3 – Design project plan.

IT-PRG 10 – Design, create, and maintain a database.

- IT-PRG 10.1 – Explain database development processes.
- IT-PRG 10.2 – Create, populate and maintain a database.

IT-WD 01 – Analyze customer requirements to design and develop a Web or digital communication product.
• IT-WD 01.1 – Collect and evaluate data to identify customer requirements.
• IT-WD 01.2 – Collect requirements data from customers and competing web sites.

IT-WD 05 – Develop, administer and maintain Web applications.

• IT-WD 05.1 – Implement functional design criteria.
• IT-WD 05.2 – Create product visual design.
• IT-WD 05.3 – Employ basic motion graphic programming knowledge.

IT-WD 10 – Comply with intellectual property laws, copyright laws and ethical practices when creating Web/digital communications.

• IT-WD 10.1 – Explain the concept of intellectual property.
• IT-WD 10.2 – Differentiate between copyright and trademarks.
Common Core State Standards

English Language Arts

Key Ideas and Details:

- CCSS.ELA-LITERACY.RI.11-12.3 Analyze a complex set of ideas or sequence of events and explain how specific individuals, ideas, or events interact and develop over the course of the text.

Text Types and Purposes:

- CCSS.ELA-LITERACY.W.11-12.2 Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content.

Mathematics

Building Functions:

- CCSS.MATH.CONTENT.HSF.BF.A.1.A Determine an explicit expression, a recursive process, or steps for calculation from a context.

Modeling with Geometry:

- CCSS.MATH.CONTENT.HSG.MG.A.1 Use geometric shapes, their measures, and their properties to describe objects (e.g., modeling a tree trunk or a human torso as a cylinder). *
**Course:** C-ROM  
**Unit:** IV – Website and Video Making Skills  
**Grade Level:** 9-12

**Unit Overview:** In Unit 4, students are exposed to many real life applications of computers and computer programs. Students have the opportunity to explore video editing, game creation, networking, databases, website creation, and 3D design.

**Common Career Technical Core (CCTC):** IT-SUP 05.1, IT-SUP 05.2, IT-NET 3.1, IT-PRG 01.1, IT-PRG 02.1, IT-PRG 02.2, IT-PRG 02.3, IT-PRG 10.1, IT-PRG 10.2, IT-WD 01.1, IT-WD 01.2, IT-WD 05.1, IT-WD 05.2, IT-WD 05.3, IT-WD 10.1, IT-WD 10.2

## Suggested Unit Projects

**Choose At Least One**

| Have students design a product in SketchUp Make. In addition, students can use a 3D Printer to demonstrate their completed project to the class. | Create a video portfolio that incorporates the different works created during this Unit including website design, game design, and 3D modeling. The video will also include an explanation of each and the steps required to achieve the result demonstrated. |
