Principles of Hospitality and Tourism Curriculum

2.5 Credits

Unit Two
Principles of Hospitality and Tourism

Course Description

Principles of Hospitality and Tourism is one of the commencement courses in the Culinary Arts, Hospitality & Tourism pathway. The units are purposed to engage students through a series of career exploration lessons using project-based learning techniques; with an emphasis on strengthening literacy, project management, leadership, and team building skills while also fostering creativity and innovation. Students realize and utilize transferable academic skills to the hospitality and tourism industry and explore the roles within each department of the industry.

Students also create tools that they will use throughout the course, including but not limited to, a notebook and a general taxonomy of key terms in hospitality and tourism.

Educational Technology Standards

- **Technology Operations and Concepts**
  - Collaborate in online courses, learning communities, social networks or virtual worlds to discuss a resolution to a problem or issue.

- **Creativity and Innovation**
  - Apply previous content knowledge by creating and piloting a digital learning game or tutorial.

- **Communication and Collaboration**
  - Develop an innovative solution to a real world problem or issue in collaboration with peers and experts, and present ideas for feedback through social media or in an online community.

- **Digital Citizenship**
  - Compare and contrast policies on filtering and censorship both locally and globally.

- **Research and Information Fluency**
  - Research and evaluate the impact on society of the unethical use of digital tools and present your research to peers.

- **Critical Thinking, Problem Solving, Decision Making**
  - Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.
**Career Ready Practices**

*Career Ready Practices describe the career-ready skills that all educators in all content areas should seek to develop in their students. They are practices that have been linked to increase college, career, and life success. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.*

### Career Ready Practices

- **CRP5. Consider the environmental, social and economic impacts of decisions.**  
  Career-ready individuals understand the interrelated nature of their actions and regularly make decisions that positively impact and/or mitigate negative impact on other people, organization, and the environment. They are aware of and utilize new technologies, understandings, procedures, materials, and regulations affecting the nature of their work as it relates to the impact on the social condition, the environment and the profitability of the organization.

- **CRP6. Demonstrate creativity and innovation.**  
  Career-ready individuals regularly think of ideas that solve problems in new and different ways, and they contribute those ideas in a useful and productive manner to improve their organization. They can consider unconventional ideas and suggestions as solutions to issues, tasks or problems, and they discern which ideas and suggestions will add greatest value. They seek new methods, practices, and ideas from a variety of sources and seek to apply those ideas to their own workplace. They take action on their ideas and understand how to bring innovation to an organization.

- **CRP7. Employ valid and reliable research strategies.**  
  Career-ready individuals are discerning in accepting and using new information to make decisions, change practices or inform strategies. They use reliable research process to search for new information. They evaluate the validity of sources when considering the use and adoption of external information or practices in their workplace situation.

- **CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.**  
  Career-ready individuals readily recognize problems in the workplace, understand the nature of the problem, and devise effective plans to solve the problem. They are aware of problems when they occur and take action quickly to address the problem; they thoughtfully investigate the root cause of the problem prior to introducing solutions. They carefully consider the options to solve the problem. Once a solution is agreed upon, they follow through to ensure the problem is solved, whether through their own actions or the actions of others.

- **CRP9. Model integrity, ethical leadership and effective management.**  
  Career-ready individuals consistently act in ways that align personal and community-held ideals and principles while employing strategies to positively influence others in the workplace. They have a clear understanding of integrity and act on this understanding.
### Career Ready Practices

in every decision. They use a variety of means to positively impact the directions and actions of a team or organization, and they apply insights into human behavior to change others’ action, attitudes and/or beliefs. They recognize the near-term and long-term effects that management’s actions and attitudes can have on productivity, morals and organizational culture.

**CRP10. Plan education and career paths aligned to personal goals.**
Career-ready individuals take personal ownership of their own education and career goals, and they regularly act on a plan to attain these goals. They understand their own career interests, preferences, goals, and requirements. They have perspective regarding the pathways available to them and the time, effort, experience and other requirements to pursue each, including a path of entrepreneurship. They recognize the value of each step in the education and experiential process, and they recognize that nearly all career paths require ongoing education and experience. They seek counselors, mentors, and other experts to assist in the planning and execution of career and personal goals.

**CRP11. Use technology to enhance productivity.**
Career-ready individuals find and maximize the productive value of existing and new technology to accomplish workplace tasks and solve workplace problems. They are flexible and adaptive in acquiring new technology. They are proficient with ubiquitous technology applications. They understand the inherent risks-personal and organizational-of technology applications, and they take actions to prevent or mitigate these risks.

**CRP12. Work productively in teams while using cultural global competence.**
Career-ready individuals positively contribute to every team, whether formal or informal. They apply an awareness of cultural difference to avoid barriers to productive and positive interaction. They find ways to increase the engagement and contribution of all team members. They plan and facilitate effective team meetings.

Key Ideas and Details

- CCSS.ELA-LITERACY.RI.9-10.3 Analyze how the author unfolds an analysis or series of ideas or events, including the order in which the points are made, how they are introduced and developed, and the connections that are drawn between them.

Craft and Structure:

- CCSS.ELA-LITERACY.RI.9-10.4 Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the cumulative impact of specific word choices on meaning and tone (e.g., how the language of a court opinion differs from that of a newspaper).

Production and Distribution of Writing:

- CCSS.ELA-LITERACY.W.9-10.5 Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

CCSS - Mathematics

Calculate expected values and use them to solve problems:

- CCSS.Math.Content.HSS.MD.A.2 Calculate the expected value of a random variable; interpret it as the mean of the probability distribution.
# Unit Overview:

This unit introduces students to the environmental and economic impact of travel and tourism, which is becoming increasingly important to modern hospitality and tourism businesses. Students learn about ecotourism and destination life cycles, which provide the conceptual foundation for studying the environmental impact of travel and tourism. Students also evaluate possible solutions to environmental damage caused by travel and tourism, and brainstorm solutions for it. In addition, students consider the economic impact of tourism in certain locations throughout the world. Students compare countries that rely almost entirely on tourism revenue with countries that maintain a diversified economy, in which tourism has a smaller, yet still significant, economic impact. Students learn about the information that economists, politicians, and business leaders collect to track the economic impact of tourism.

### Choose At Least One

**Research**  
In your group, use specific websites assigned to complete your research on a given destination – (Antarctica, Great Barrier Reef, Machu Picchu, Lake Tahoe, and Phuket). Answer the following questions in 3 Paragraphs. Two addressing the environment and one with your conclusion. Combine all the answers to the research questions on one sheet to make a complete research assignment.

- How has this destination changed over time?  
- What environmental concerns or problems have been reported about this place? How are they related to tourism?  
- What, if anything, has been done to address these concerns (e.g., local community protests, environmental reports, government involvement)?  
- What do you think might be done to stop and/or reverse environmental damage at this destination? Why?

**Preparation for Debate.**
