

# DEVELOPMENTAL ESL III

## Unit 4

## *Course Description* *(Workshop Model)*

Developmental English as a Second Language consists of developing reading, writing, speaking, and listening skills. During Developmental ESL instruction, students will learn to use reading and writing strategies to help them become effective English language readers and writers. ESL teachers will use the appropriate leveled language objectives to build lessons for ELLs, which reflects what is covered in the general education program. In this way, all teachers work on the same Student Learning Objectives connected to the Common Core standards. The design of language objectives are based on the alignment of the World-Class Instructional Design Assessment (WIDA) Consortium’s English Language Development (ELD) standards with the Common Core State Standards (CCSS). WIDA’s ELD standards advance academic language development across content areas, ultimately leading to academic achievement for English learners. As English learners are progressing through the six developmental linguistic stages, this course will assist all teachers working with English learners to appropriately identify the language needed to meet the requirements of the content standard. At the same time, the language objectives recognize the cognitive demand required to complete educational tasks. The teachers will instruct students using the workshop model philosophy with the use of the “I DO, WE DO, YOU DO” method of instruction. Other skills such as grammar, vocabulary, listening, and speaking are infused in the exploration of effective reading and writing. The Common Core State Standards are designed to provide a clear understanding of what students are expected to learn, providing teachers and parents the knowledge of what they need to do to help them. The standards are designed to be robust and relevant to the real world, reflecting the information and skills that our young learners need for success in college and careers. It is our goal to establish a community of learners to become productive citizens in society striving towards pursuing their life-long goals. Through an enriching and rigorous education and with on-going support, our students will be fully prepared for the future to compete successfully in the global economy.

## Interdisciplinary Connections

### **Social Studies Connection:**

#### ***Global Happiness***

It is important to be aware of how countries function globally. There are countries that feel a high level of national pride, personal freedom, safety, and security. There are also countries that suffer from poverty, disease, war, and human rights violations. Learning the components of a “happy country” versus a “sad country” and where these countries are located in relation to the United States is critical to understanding global politics. Students will work in groups to create an action plan with strategies on how to assist the “sad countries” in surmounting their societal hardships.

### **Science Connection:**

#### ***Laughter is the Best Medicine***

There are many positive side effects of laughter on the body such as boosting the immune system, preventing heart disease, reducing stress, and an increase in overall emotional health. A simple laugh or smile can produce positive outcomes for body, mind, and soul that prove to be extensive and invaluable. Students will create an anchor chart to display the physical and mental benefits of happiness.

### **Health Connection:**

#### ***Different levels and degrees of happiness***

There are many ways that happiness can be measured. Some people describe happiness on a scale from 1 to 10 and others describe happiness on a situational basis. Learning to distinguish the different levels of happiness can be a helpful social skill. Students can individually interview a diverse group of people on the levels/degrees of their personal happiness.

## Enrichment

The goal of Enrichment is to provide learners the opportunity to participate in extension activities that are differentiated and augment the district's curriculum. Teachers are to accommodate based on student individual needs.

**Seeking to build each learner's capacity to do the following:**

- Show a high degree of intellectual, creative and/or artistic ability and demonstrate this ability in multiple ways.
- Pose questions and exhibit sincere curiosity about principles and how things work.
- The ability to grasp concepts and make real world and cross-curricular connections.
- Generate theories and hypotheses and pursue methods of inquiry.
- Produce products that express insight, creativity, and excellence.
- Possess exceptional leadership skills.
- Evaluate vocabulary
- Elevate Text Complexity
- Inquiry based assignments and projects
- Independent student options
- Tiered/Multi-level activities
- Purposeful Learning Center

- Open-ended activities and projects
- Form and build on learning communities
- Providing pupils with experiences outside the 'regular' curriculum
- Altering the pace the student uses to cover regular curriculum in order to explore topics of interest in greater depth/breadth within their own grade level.
- A higher quality of work than the norm for the given age group.
- The promotion of a higher level of thinking and making connections.
- The inclusion of additional subject areas and/or activities (cross-curricular).
- Using supplementary materials in addition to the normal range of resources.
