Teacher Guide: Creating a Google Classroom Assignment from ConnectED

This guide shows teachers how to create a Google Classroom assignment while using ConnectED lesson resources.

1. Once you have located the lesson resource inside ConnectED click the **Tools** icon and select **Share with Google Classroom**.
   
   **Note:** If you do not see the Share to Google Classroom option, you will not be able to share out that resource to Google Classroom.

2. **Select the class & Action** for the ConnectED resource you are sharing. Click **Go**.
   
   **Note:** for the purpose of this guide I have selected the Create Assignment action.
3. The assignment details will be displayed and the teacher can make any necessary adjustments.
   A. Title: the name of the ConnectED lesson resource.
   B. Instructions (optional): specific instructions for the students to do with the resource.
   C. ConnectED lesson resource that is being assigned to the students.
   D. Point value for the assignment.
   E. Due date for the assignment.
   F. Click Assign to finalize the process.

4. You will get a confirmation window letting you know that you posted to your Google Classroom. Click View if you wish to see a list of the items you have posted for your class.
