6. A
7. C
8. D
9. B
10. A
11. B
12. C
13. D
14. C
15. B
16. D
17. C
18. B

Open Ended/ Short Essays

1. In Basketball, the position that I feel is the most important is center. Center is usually called the fifth position. Center position is played by the biggest and usually the strongest player on the team. Most prolific franchises have been dominant for years because of their powerhouse centers in their roster. A center can cover a lot of floor space and if athletic enough can block shots, get rebounds, dunk over opponents, and penetrate good rival offense.
2. It is extremely important for individuals to remain physically fit and continue to exercise throughout their life-time. Individuals who exercise are known to be more happy, have more energy to complete daily task, eat healthier, perform better in academics, are more likely to overcome and reduce acute and chronic diseases. In contrary, individuals who do not maintain an active lifestyle are more likely to become obese, become depress, more prone to diseases and heart attacks, lower self-esteem, and a smaller appreciation for holistic wellness, sports, and recreation.
