

NEW JERSEY AUDUBON TEACHERS' SCHOOL OF ECOLOGY

WHEN

July 23 – 27, 2018
9am – 3pm daily

WHERE

Scherman-Hoffman
Wildlife Sanctuary

11 Hardscrabble Road, Bernardsville, NJ 07924

New Jersey Audubon's Teachers' School of Ecology sponsored by Ashland, Inc. is a week-long program for elementary and middle school teachers. The program offers in-depth experiences that use inquiry as a basis for building effective field studies. We will highlight New Jersey's natural phenomena and our relationships to the environment. Learning activities are place-based and support student success in demonstrating proficiency with the New Jersey Student Learning Standards for Science (NJSLS-S). By connecting the classroom to the real world, teachers can help students become more aware of the world around them, take an active role in preserving their local environments and acquire the critical thinking, problem solving and basic life skills necessary to become informed global citizens.

Application deadline is March 15, 2018

You will be notified of program status beginning April 1, 2018.
