For more information: 609-400-3832 or dale.rosselet@njudubon.org

Practice inquiry-based teaching techniques to help integrate STEM learning into your classroom.

This program combines classroom instruction with outdoor experiences that integrate ecology, environmental science, and sustainability concepts. Get practical hands-on learning in an urban setting that strengthens critical, analytical, and creative thinking skills and empowers students to preserve the environment.

“The workshop was very useful for teachers and provided a vast amount of resources to be used in the classroom. I feel very confident this school year.”

—Yaniris Varela-Ulloa, North Bergen High School, North Bergen

“This week was an eye opener. Although I already use some problem and project-based learning in some of my classes, this workshop showed me how to institute it in all classes.”—Anna Schreiber, Hudson Catholic High School, Jersey City
