the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.3 billion. This increase is due to the fact that the number of children under 15 years of age has increased in every country in the world, with the largest increase occurring in Africa (United Nations 2000).

There are a number of reasons why the number of children under 15 years of age has increased. One reason is that the number of children under 15 years of age has increased in every country in the world, with the largest increase occurring in Africa. Another reason is that the number of children under 15 years of age has increased in every country in the world, with the largest increase occurring in Africa. A third reason is that the number of children under 15 years of age has increased in every country in the world, with the largest increase occurring in Africa.

The number of children under 15 years of age has increased in every country in the world, with the largest increase occurring in Africa. This is due to the fact that the number of children under 15 years of age has increased in every country in the world, with the largest increase occurring in Africa. The number of children under 15 years of age has increased in every country in the world, with the largest increase occurring in Africa.

The number of children under 15 years of age has increased in every country in the world, with the largest increase occurring in Africa. This is due to the fact that the number of children under 15 years of age has increased in every country in the world, with the largest increase occurring in Africa. The number of children under 15 years of age has increased in every country in the world, with the largest increase occurring in Africa.

The number of children under 15 years of age has increased in every country in the world, with the largest increase occurring in Africa.
