

# Attention Parents!

## Tips for Staying Cool in Summer School

In anticipation of rising temperatures during the 2017 Summer Program, Paterson Public Schools would like remind parents to please encourage children to:

- Wear appropriate summer clothing
  - Light color clothing
  - Wear shorts and T-shirts
  - Wear cooler fabrics such as cotton
- Although students will receive water at school, students may bring in an extra water bottle
  - Store in freezer overnight to stay cool during the day
  - Add ice to water to keep cool

Paterson Public Schools is taking the following measures to keep cool:

- Rotating students through cooling stations (i.e. Library, computer lab)
- Students will not be permitted to play outside during peak heat hours
- Water will be provided for every student

Please address all concerns to the Summer Program Administrator located at the program site.
