Adoption of Textbooks

2510 ADOPTION OF TEXTBOOKS

The Board of Education believes that textbooks should support and enrich the curriculum and make possible the achievement of the district's instructional goals. The Superintendent shall develop procedures for continual review of new texts being offered and evaluation of those already in use to ensure that the textbooks used in this district are up to date in the factual matter they present and further the district's instructional goals. Textbooks and instructional materials should be judged by additional standards which shall include, but not be limited to:

1. Whether the materials reflect the district's affirmative action policy, which prohibits the teaching or encouragement of racial, gender, religious, ethnic or age bias;
2. Whether it helps pupils develop abilities in critical reading and thinking; or
3. Whether it provides effective basic or advanced learning.

The review process shall:

1. Be conducted by staff members, particularly those teachers who will be using the materials as an integral part of the instructional program;
2. Whether it provides effective basic or advanced learning;
3. Provide an opportunity for public inspection of the recommended text.

The Superintendent shall develop administrative rules outlining a procedure for the selection of instructional materials which meets the above criteria. Instructional materials used within the district should be sufficient in quantity and scope to meet the needs of every pupil in the district.

The Board of Education, by law, makes the final textbook selection decision. However, prior to final adoption, the recommendations resulting from each review will be given thorough consideration.
