The Board of Education will draw on the knowledge of the community in developing policies and programs in compliance with statute and administrative code.

The Board of Education encourages local businesses and individual residents who have training, experience, or interest in taking an active part in the district's educational programs. Those persons identified by the Superintendent and the staff, may be invited to act as advisors.

The Board of Education shall also take advantage of the physical and financial resources of the community when such resources provide learning opportunities not otherwise available to our pupils. Pupil safety shall be a primary concern in making use of such resources.

Adopted: 31 October 2002
